2021-2022

Won the third prize for scientific research students school

PROFILE

I have more than 1 year of experience as a Front-end Developer. I am passionate about creating intuitive and efficient user systems. I enjoy working in a team, am eager to learn, and am open to new technologies. I am looking for another opportunity in a new environment and look forward to collaborating and growing with your team.

EXPERIENCE

SUPERSHIP
`10/2023 - Present`

Front-end Developer

SuperShip provides logistics services including domestic freight transportation, COD payment management, order tracking, and supply chain management, helping optimize the delivery process and supporting e-commerce businesses. And systems related management such as: SuperShip, SuperAI and mini app on Zalo platform.

Use React, Tailwind CSS, and Ant design, etc...

- Building and structuring the entire front-end source code
- Integrate commitlint, eslint, and lint-staged into source code
- Developing reusable components for the system
- Developing and implementing new front-end features
- Implementing responsive design
- Integrating APIs into the website
- Maintaining and refactoring code
- Fixing website issues and bugs as they arise

Mini App

- Use React, Tailwind CSS, and ZaUI to develop a mini app on the Zalo platform.
- Integrate Zalo platform-specific APIs for mini apps.

Portal

Use Tailwind, HTML, CSS, JS, Sergey to implement the interface and integrate the API

SuperShip Dashboard

Developed a web application with separate mobile and desktop sources, dynamically rendering different UIs based on screen size. Configured both versions to securely share authentication tokens, ensuring seamless user experience across platforms.
